SERIES SPEED-MAX 110

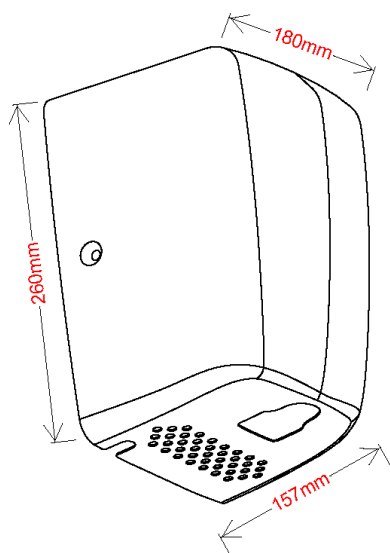

MODEL: SM-110

Small, powerful, fully automatic

VOCE DI CAPITOLATO

One of the smallest hand dryers ever realized, it is operated by photocell and provides a powerful air flow concentrated for the desired time. The reduced dimensions make it particularly suitable for small bathrooms or for installation between mirrors above washbasin, furthermore, the temperature automatic sensor, regulates the activation of the heating element just in case the ambient temperature drop below 25°C achieving significant energy savings. The UV device and the filter of which the hand dryer is equipped, purify the inlet air and later the outlet air.'

technical information

activation	sensor
cover material	Stainless Steel <i>AISI 304</i>
finishing	bright/satin
electrical protection level	class I
inner protection level	IPX1
supply voltage	220/240V
main frequency	50/60 Hz
motor power	550 W
heating element	650-750 W
total absorption	550-1250 W
max absorption with drying cycle	3,6 W
outlet air speed	216 Km/h
air flow	570 m ³ /h
average drying time	7-12"
noise level db	70 dB at 1 m
filter	yes
UV device	yes
dimensions (mm)	180x260x157
weight (kg)	3,0

RANGE

SM110 (l)	inox bright
SM110 (s)	inox satin
